

## Sale of the Air and Gas sector

Europlasma announces that its 50.2% owned subsidiary Financière GEE (FIG) has entered into exclusive negotiations with CMI Group for the sale of the sub-group Europe Environnement, specialized in Air & Gas treatment solutions.

The parties intend to close the deal as soon as possible and at the latest before the end of 2013.

A detailed communication will be published once the definitive agreements are executed.

### About Europlasma

Europlasma is a French Group operating in the clean technologies and renewable energy production industries. Founded in 1992 to apply its proprietary plasma torch technology to hazardous waste destruction, it is now built on the following four business units:

- **Europlasma** is a world-wide supplier of plasma heating systems and related applications
- **Inertam** is the global specialist in the destruction and recycling of asbestos and hazardous waste
- **Europe Environnement** is the European expert in industrial ventilation and gas cleaning systems.
- **CHO Power** is a producer of electricity from waste and biomass gasification.
